Justin,

When I first approached the staff to explain that we would be installing the CLIPS program, I was met with some trepidation. Our brokerage has maintained the same processing system for a number of years and the idea of adopting a completely new system (in only one week) caused some nervousness – and rightfully so.

Once the team was able to meet you the first day and learned more about the CLIPS program, they immediately began to see the potential benefits to your system. After only one week, our office has been completely transformed. The CLIPS program has been successfully implemented, the staff believes in the process and we have already begun to realize our new potential.

Your ability to instill confidence within the team, and your genuine belief in the program was invaluable in the installation process. I would highly recommend that any brokerage looking to increase sales, reduce staff stress and streamline their office procedures implement the CLIPS program.

With Thanks,

Dwayne Day
